1 Change Control

1.1 Changes Introduced

Summary and description of most recent change	Revision Date
Version 2.3	21/07/2023
Added Appendix B with Additional reporting data (B.1) regional reporting (B.2) information. Added additional file names and schedule information in appendix A.1	
Version 2.4	12/03/2024
Removal of reference to FIS.	
Version 2.5	28/10/2024
Appendix C.1 name change to 'Additional Reporting Format(s)' and added details for formats available. Appendix C.2 name change to 'Regional Reporting' with added details for availability.	

2 Introduction

Background

The Data Analytics Reconciliation Tool contains information currently available for collection from Worldpay in a data file format. DART is available to merchants acquired by Worldpay. This document contains information pertaining to:

- 320 Invoice File

This data file replaces the legacy Invoice File.

Purpose

The purpose of this document is to:

- outline the format and content of the invoice file
- detail the design and technical specification

2.1 Points of Reference

Further assistance on any Card Scheme matters may be obtained by contacting the address shown below:

Scheme Compliance & Management
Worldpay
Level 5, Walbrook Building
25 Walbrook
London
EC4N 8AF

E-mail: SC&Mqueries@Worldpay.com

Further assistance on related non-urgent technical queries may be obtained from:

Payment Solutions Enablement
Worldpay
Level 5, Walbrook Building
25 Walbrook
London
EC4N 8AF

E-mail: ask-pse@Worldpay.com

3 Network Connections

3.1 Network Connection Options

DART utilises the network communication options detailed in the Direct Communications Technical Specification (available separately).

3.2 General

DART allows management information relating to transactions processed by Worldpay to be collected electronically.

3.3 Data integrity / Security

The data file contains a header record, a file date and a record count. Merchants are advised to ensure that each file collected is intact by performing a check of the record count and file trailers where applicable.

3.4 Connection Failure

Merchants are advised to arrange an alternative connectivity for data collection in the event of a connection failure.

3.5 Data File Retention

DART files are retained in the Merchant's server account for seven calendar days from creation after which they are archived.

3.6 Data File Names

Please note occurrences of SSSS within data file names in this document refer to your unique Worldpay Merchant acronym.

4 Communication Links

4.1 General

The collection of DART files requires network management procedures for both Worldpay and the Merchant.

4.2 Requirements

The following requirements must be considered:

- The transmission sessions are always merchant initiated
- Communication lines should be duplicated and use a variety of routes to cater for network failures

4.3 Data Format

All files are in standard ASCII csv format when collected over a standard network connection.

5 General Information on the 320 Invoice File

5.1 File Structure

All fields are positional and of variable length. The file structure is dependent on the structure of the data processed during the processing run.

5.2 Reconciliation

The creation date of the file is contained within the file name, allowing the merchant to collect a backlog of files if needed. Current files are available on a rolling seven-day basis

5.3 Availability

Files are going to be available in line with your billing cycle.

Appendix A Data File Layouts

A.1 320 Invoice File: File Name

File name on server for UK region reporting: WP_SSSS_320INV_yyyymmdd_nnn.CSV

Regional reporting is available for this report, refer to Appendix C.2 for more details.

File name on server for Australian region reporting: WP_SSSS_320INV_AUS_yyyymmdd_nnn.CSV

All fields are variable, nnn denotes the file version for that reporting data and starts with 001.

UK Schedule: The file is delivered in line with the invoice billing cycle and available by 5pm UK on the 1st calendar day of each month and 3pm every other calendar day.

Australian Schedule: The file is delivered in line with the invoice billing cycle and available by 5pm Australian Eastern time on the 1st calendar day of each month and 3pm every other calendar day.

Destination: SFG mailbox

A.2 320 Invoice File: File Structure

A.2.1 File Record Type 00 – Header Record

Field No	Name	Length	Format	Description
1	Record Type	2	CHAR	00 – Header Record
2	File Date	8	DATE	File Run Date based on when the File was generated. YYYYMMDD
3	Billing Party ID	15	CHAR	Billing Party Identifier

A.2.2 File Record Type 01– Detailed Record

Field No	Name	Max Length	Format	Description
1	Record Type	2	CHAR	01 – Detailed Record
2	Activity Date	8	DATE	Date the fee was generated YYYYMMDD
3	Description	188	CHAR	Invoice line description of the fee
4	Fee Amount	23	NUM	Fee amount in fee currency, or tax amount in invoice currency
5	Fee Currency	3	CHAR	Currency of the fee amount column
6	Fee Type	20	CHAR	Type of fee (Assessment, Processing, Interchange, Tax)
7	Invoice Number	64	VARCHAR	Invoice number the fee is associated with
8	Rate	23	NUM	Fee, or tax rate
9	Settlement Amount	23	NUM	Settlement amount to which the fee relates i.e. the fee is specific to transactions equating to this amount
10	Settlement Currency	3	CHAR	Settlement currency of the fee
11	Fee Settlement Date	8	DATE	Settlement date of the fee (estimated) YYYYMMDD
12	Tax Description	60	CHAR	Tax description, indicating standard, or exemption from tax
13	Tax Indicator	3	CHAR	Code indicating taxable status of the fee
14	Tax Rate	21	NUM	Appropriate tax rate
15	Taxable Amount	23	NUM	Amount of the fee on which tax is calculated
16	Unit Fee	21	NUM	Per item (unit) fee applied to this invoice line
17	Unit Quantity	21	NUM	Number of items (units) for which the fee has been calculated
18	Billing Party ID	15	CHAR	Party to which the fee will be billed
19	Outlet Billing Party ID	15	CHAR	Party to which the fee generating event is associated i.e. the transaction was acquired for this party
20	Payment Instruction ID	20	CHAR	Payment instruction associated with the payment to settle this fee

A.2.3 Record Type 99 – Trailer record

Field No	Name	Max Length	Format	Description
1	Record Type	2	CHAR	99 - Trailer record
2	Record count	23	NUM	Total number of records in the file excluding the last record

Appendix B Additional Information

B.1 Additional Reporting Format(s)

This report is available in standard format only; no extended version is offered.

B.2 Regional Reporting

Specific DART files can be provided on a regional schedule if settlements are processed regionally. Currently, regional reporting is supported for UK and Australian schedules, with file structure and layouts remaining identical across regions. The Australia file is distinguished by a regional identifier in the file name, AUS for Australia.

Data is allocated to the appropriate regional file without duplication. Merchants processed solely within one region will receive only that region's file, and no regional files will be generated if there is no activity in a specific region.

Regional reporting is available for this report.
